Homeopathy may offer the best radiation treatment

by Madeleine Innocent

[Email this author](#)

(NaturalNews) Homeopathy is a truly diverse and deeply effective natural health care system for every illness under the sun. Including radiation. How is this possible?

Homeopathic treatment doesn't treat the illness. It treats the person (or animal) with the illness. There is a subtle, but deeply important difference. And it means that the labeling of an illness is of little importance to homeopaths.

But first it's important to realise that as we are all mortal, not every person can be curatively treated.

Best Protection

Although much good can be done by experienced [homeopathic](#) home prescribing, protecting against [radiation](#) poisoning may not be one of them. This is much too serious. The best [protection](#) from this problem, which will probably be with us for many years, is to ensure you improve on other areas of [health care](#), such as

- a species specific, quality, natural diet
- a quality natural supplement, preferably a plant based superfood, which also has detoxing capabilities, such as blue-green algae, chlorella, spirulina
- exercise regularly
- if you are in the fast lane, slow down, perhaps learn to meditate
- make quality time for you (to smell the roses) or take up something you love to do, perhaps always wanted to do, but never had the time or money

With this healthy regime in place, the likelihood of suffering bad radiation poisoning will lessen, even in the worst affected areas.

Symptoms of Radiation Sickness

People who suffer from radiation [sickness](#) tend to have some [symptoms](#) which will be common to everyone (the early ones are nausea and vomiting, followed by headache and fever). Even these early signs are common to other illnesses, such as [food](#) poisoning and gastric flu.

These can then be followed by dizziness and weakness, symptoms that are still common to other less serious ailments. Finally you can experience blood in the vomit and stools, hair loss, chronic infections and poor healing capability.

These are all common radiation sickness symptoms that you can see in people who are receiving radiation [treatment](#).

Professional Homeopathic Treatment

The more uncommon symptoms, which will point to your most appropriate homeopathic [medicine](#) may include any of the following:

- an enormous fear of death which prevents you sleeping
- an aversion to being on your own

- a desire or aversion for a particular food or drink, including its temperature
- worsening of the complaints during a specific time of day or night
- an increased intolerance to variations in environmental temperature
- if the complaints are more one sided
- the [nature](#) of your nausea (constant or intermittent)
- the nature of your vomit (saliva, undigested food, frothy, black, bloody, etc)
- how you feel after vomiting (better, no improvement)
- along with many others.

Because of the complex nature of [health](#) and the seriousness of radiation sickness, the best treatment may come from an experienced and knowledgeable homeopath. S/he will base your treatment on a variety of your personal symptoms and traits. It is targeted for you specifically. Ten different people who suffer from radiation sickness are each likely to receive a different medicine.

Whether your radiation sickness comes from the [environment](#) or from a medical treatment, you can lessen it or perhaps cure it completely, with good homeopathic treatment.
