

Chapter 7 - Time - The Study of Same

A) Part I - Informational Comments

So you were taught how to tell time before you were in kindergarden! And, everyone you know, including your individual self knows everything about the subject. Of course, the masses of people are never wrong about any subject. Is that because they were taught by the Public Fool(school) System? Is that because your enemy, the Cainnites, who run and control Babylon want to give you correct information?

"...and think to change times and laws:..." - Dan. 7-25. 'But, of course that only applied to those old times of Daniel', so said the man which was late for the bus to THE KINGDOM OF HEAVEN!

"And God established the sun as a great sign over the earth for days and for sabbaths(appointed times) and for months and for festivals and for years and for jubilees and for all seasons of the years." - Enoch Chap. II: 8. Do you use the sun for your 'sign'? Have you ever heard of the 'SIGN CALENDAR'? And, of course, you were taught that calendar in kindergarden or college or when?

"And there will be those who will make observations of the moon, for this one(the moon) corrupts the stated times and comes out earlier each year by ten days. And in this way they will corrupt the years and will observe a wrong day as the day of testimony and a corrupted festival day, and every one will mix holy days with unclean ones and unclean with holy; for they will err as to months and sabbaths and festivals and jubilees." - Enoch Chap. VI:34&35. Anybody ever study or hear how the Chaldees/Hebrews/Cainnites tell(advise) the world as to how they tell time? Do they use the moon? To start the year? To thusly, use all manner of corruption to bring confusion and error?

NOTE! - Did you see in the above 'day of testimony'? Did you 'see' in paragraph 3 of this page '(appointed times)' which I added? The word, sabbath(s) is a Cainnite word established to confuse the fact that time(s) is(are) appointed! THE FATHER In Heaven establishes and appoints time according to HIS WILL! Your failure to get this 'point' will not allow you to get on the right bus at the right time! Want to think about this?

"And they will forget all my law and all my commandments and all my judgements, and they will err in reference to new moons(months) and sabbaths(appointed 7th days) and festivals and jubilees and ordinances." Enoch Chap. I:14. Sooo, does any one think that they were taught all they needed to know in kindergarden about the subject of TIME? Well, this individual who is typing, SURE DOES NOT!!!! I need more!

Have you the reader of this little paper studied time from a historical point of view? How many different calendars have been used since THE CHRIST was born? When was the most recent change introduced to the world? Who ordered said change? What was the final implimnation date effected in North America?

If any individual can answer any of the forgoing questions, I surely would like to talk with said individual!!

So, let's start with something that every single individual which reads this little paper can verify with almost no trouble. And, you, each of you are expected to do this research of verification on your own. *How is it that Pres. George Washington was the only president of the United States which had a birthday on the same month and the same day in TWO(2) DIFFERENT YEARS? TWO(2) is not a typo!!!

What were his(George's) different years of birthday? This is in the history books, but, I guarantee you that it is not taught in school which most attend.

What was the final year in which the entire 'civilized world' was required to switch to this new time system? Who ordered this 'time' change? What year did this 'individual' order this time change?

NOW, before I offer some suggestions to help you find a very few of these answers, I WANT YOU TO ASK YOURSELF ONE MORE QUESTION. And, I want you to answer yourself honestly. HOW MANY HOURS HAVE YOU SPENT IN YOUR ENTIRE LIFE STUDYING AND RESEARCHING, the following: How many days are in a year? Did you just accept the 'masses notion and instruction' that there are 365½ days in a year? Did you actually do some research on said subject?

Well, this silly boy, as some would call me, has spent 'hundreds and hundreds' of hours on said subject. Probably, just means that I am not that smart since it took me that long to learn maybe about 40% of the actual measurements. I know less than 10% of the 'understanding' of said data. But, that is a really complicated subject outside the 'scope' of this entire course of 26 weeks.

GO to 1525 A.D. (pagan time). Look-up the Papal Bull of Pope Gegory. Find the number of times that TEN(10) days were automatically subtracted from the calendar days. SEE in said Bull(as in manure) when the final implimnation date for the world to change to the calendar of THE WHORE OF BABYLON.

AND, IF YOU DO NOT LOOK-UP THE SUBJECT OF NAVIGATION(changes to same) in the 16th Century, that is between 1500 and 1600 a.d.(pagan time), then I suggest that you have missed a special opportunity to learn how many 'hours are in a day'!!!!

One last thought of Informational Comments: "The celebration of the new year is the oldest of all holidays. It was first observed in ancient Babylon about 4,000 years ago. About 2,000 BC the Babylonian New Year began with the New Moon after the vernal Equinox." - quote taken from Rural Arkansas, January 2010, page 5. I just wanted to get some recent information to you about 'Moon Walkers'. And, who they get their information from to make their 'important' decisions about the 'bus ticket' and 'time of departure'!!

Enjoy your hunt,

Jerry F. Kirk
