

"PREFACE"

The intention of the GATHERING/OFFERING is provide a 'course-type' study for those with 'eyes and ears'. It is important to read from the beginning of the paperwork listed herein to gain the 'intended flavor'. Thusly, a failure to follow instructions is not creditable to my side.

Where 'audios' are associated with a written paper or papers: it is expected for the individual to listen to said audios. It is somewhat possible that the audios will provide additional insight.

A listing of study reference books and items are provided:

- 1) A good dictionary - preferably 30 to 50 years old.
- 2) A King James Bible (authorized) - although this is not the best bible, it is necessary to allow one to use #3 below.
- 3) A Strong's Exhaustive Concordance (more properly known as Strongstein's) - This item is used to locate various verses, for study purposes. One should not use Strongstein's for translating English into the canninite language and then back into English unless one likes to be 'deceived and lied' to about the subject matter.
- 4) Book of Enoch from the Ethiopic by Laurance (all others are frauds)
- 5) Book of Jubilees from the Ethiopic
- 6) Book of Jasher
- 7) Ferrar Fenton Bible
- 8) Col. Tompson Bible
- 9) A tape recorder for recording various items and to allow the individual to listen without making 'written notes' and thusly, allowing for 'review' at a later date.
- 10) Your good common sense 'expanded' to a new level.

It is suggested that many of these items can be purchased 'used'. BE VERY CAREFUL and do not buy a Strongstein's which is newer than 2000 as the new ones have been changed in certain areas. You may wonder 'why'? Did someone 'speak' on certain subjects just about the year 2000?

THANKS AGAIN FOR 'LOOKING'!!!!!!

N.I.V. Bibles and others never should be used for 'fine-starting' purposes.
